

De La Salle College is a school which operates with the consent of the Catholic Archbishop of Melbourne and is owned, operated and governed by Melbourne Archdiocese Catholic Schools Ltd (MACS).

Purpose

This policy is aligned with the First Aid Policy for MACS schools. The policy sets out the actions and resources required in De La Salle College to ensure adequate first aid provision for students, staff and others in the school environment and when engaged in school approved activities.

Scope

This policy applies to students, staff, families and others at De La Salle College.

Principles

The following principles underpin this policy:

- our college has a responsibility to ensure a safe working and learning for all members of college communities
- the principal and all staff have a duty of care to all students and the provision of adequate facilities and resources supports this in the college.

Policy

De La Salle College is responsible for providing first aid assistance to students in the event of illness or a medical emergency.

First aid facilities

The principal ensures that first aid facilities are in place to meet the needs of staff, students and others in college environments and for school approved activities, including for off-site activities such as camps and excursions, and out of hours school events. The areas have appropriate signage and is readily identified as first aid.

Sufficient staff must be trained under the provisions of the *Occupational Health and Safety Act 2004* (Vic.) to ensure adequate provision of first aid, based on the number of students in the school or engaged in the activities, the activities being undertaken and the school environment.

First aid kits

1. The Health Centre and first aid kits will be available for use at all times. A comprehensive supply of basic first aid materials will be stored in the Health Centre.
2. Campus receptionists ensure campus first aid kits are fully stocked and consult with the First Aid Officer for additional supplies required.
3. Sporting/ACC Coaches receive a first aid kit from the Director of Sport/Sports Assistant. The Sports Assistant monitors the supplies and contacts the Health Centre if the first kits require replenishing.

4. Teachers in charge of excursions, trips and camps are to consult with the First Aid Officer and campus receptionists for first aid kits prior to departing the College for the offsite activity.
5. Teachers on yard duty respond to minor injuries and notifies the Health Centre for assistance if required.

First aid staff and training

First aid officers provide initial care to injured students, staff or others in accordance with their level of training. They are not required to diagnose conditions or provide ongoing medical assistance.

The principal or their delegate will ensure that designated first aid officers and general staff have completed the recognised training. A first aid officer with current first aid qualifications must always be available to respond and assist an ill or injured person.

Where appropriate, a first aid officer will refer the ill or injured person to additional medical advice or assistance.

Training for anaphylaxis management is undertaken by all staff in the college.

A register of all first aid training is kept in the school by the HR Manager.

Administration of First Aid

College staff are responsible for providing first aid assistance to students in the event of illness or a medical emergency.

Our college staff who have been trained will administer first aid in accordance with their training. Trained staff can provide basic first aid with [DRSABCD](#).

In a medical emergency, staff take emergency action and do not need to obtain parent/carer consent to do so. Staff contact Triple Zero “000” for emergency medical services at any time.

On each occasion where first aid is administered to a student with a minor injury or condition, our school staff will notify parents/guardians/carers by contact details available at school. On each occasion where first aid is administered for a serious injury or condition, or in an emergency, school staff will attempt to contact parents/carers or emergency contacts as soon as reasonably practical.

School staff are to determine whether students presenting with infectious illnesses and their contacts require an [exclusion](#) period from school and abide by any minimum period in accordance with Department of Health.

Administration of First Aid for head injury

For students who have an impact to the head, suspected concussion, or observed concussion, our school staff can use the College’s Head Injury Guidelines to help identify a suspected concussion.

If a student demonstrates symptoms of a [moderate to severe head injury](#) (neck pain or tenderness, double vision, weakness or tingling/burning in arms or legs, severe or increasing headache, seizure or convulsion, loss of consciousness, deteriorating conscious state, vomiting, increasingly restless, agitated or combative), the school is to call an ambulance immediately. If the College’s Head Injury Guidelines are used, the school must contact the parent/guardian/carer about the injury, even if the symptoms resolve. In the event of a suspected concussion, the parent/guardian/carer is asked to collect the student and have a medical assessment.

If a student has been diagnosed with a concussion/mild head injury, our schools will act on medical advice where this is provided to support a return to school and associated activities including participation in sport.

Communication with parents/guardians/carers

The college requires parents provide up-to-date and accurate medical information relating to students, including information about conditions such as anaphylaxis, asthma and diabetes. Parents are requested to provide this information annually, prior to camps and excursions and if the child's medical condition changes since the information was provided.

Records of incidents, injuries and first aid treatment are documented. First aid records are retained within the college and in line with MACS policies for information recordkeeping, retention and disposal.

An incident report will be completed when first aid is administered. This report will be kept in the college and a copy provided for the parent/guardian/carer of the student.

Parents/guardians/carers are notified as soon as possible if required to collect an ill or injured student from the college. When a parent/guardian/carer cannot be contacted, the principal or nominated staff member will contact the emergency contact nominated by the parent/guardian/carer.

Camp Coordinators are responsible for the collection of student medical conditions including dietary requirements prior to camps.

Staff in charge of excursions refer to Consent2Go app for up-to-date information of student medical conditions prior to departure on excursions.

This policy and other school policies and procedures for the distribution of medication and management of students with medical conditions are published on the school's website and college intranet OLLIE.

Definitions

First aid

The emergency treatment provided to employees, students and others who suffer injury or illness while at work/school, using the facilities or materials available at the time. In the case of severe injury or illness, members of staff are not required to diagnose or treat the condition apart from carrying out the appropriate first aid procedures. Diagnosis and treatment are the responsibility of the ambulance officer or medical practitioners.

First aid officers

Staff members who have been trained in first aid and are designated to provide initial care of ill or injured staff, students or others.
